Ideation Phase: Brainstorm and Idea Prioritization

Field	Details
Date	02 November 2026
Team ID	N/A (Individual Project)
Project Name	EV Value & Longevity Analytics Dashboard
Prepared by	Piyush Malviya
Maximum Marks	4 Marks

The ideation phase of this project began with a simple question: which EV is actually the best value for the money, and how long will its battery keep that value? The ideas below were listed first and then ranked on feasibility and importance.

Step 1: Brainstorm and Idea Listing

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Piyush Malviya	Create a Value Index (price per km of range) so segments can be compared on cost-for-range, not just sticker price.	Metric Design	N/A
2	Piyush Malviya	Compare battery chemistries (LFP, NMC, NCA, Sodium-Ion, Solid-State) on cycle life and 5-year degradation.	Data Analysis	N/A
3	Piyush Malviya	Build a 9-chart interactive dashboard (sales, price, range, safety, rating, country, region, trend).	Dashboard	N/A
4	Piyush Malviya	Add a manufacturer leaderboard for sales volume and average customer rating across 200 OEMs.	Benchmarking	N/A
5	Piyush Malviya	Map manufacturing countries and market regions to show where supply and demand sit.	Geospatial	N/A
6	Piyush Malviya	Write a 5-chapter Tableau Story for a fleet-buying decision meeting.	Storytelling	N/A
7	Piyush Malviya	Train a model on the train file and test it on the 100,000-row test file to forecast annual sales.	Predictive	N/A

Step 2: Idea Prioritization

Group	Final Idea	Feasibility	Importance	Priority	Selected
N/A	9-chart interactive EV dashboard	High	High	1	Yes
N/A	Value Index (price per km of range)	High	High	2	Yes
N/A	Battery chemistry longevity comparison	High	High	3	Yes
N/A	Manufacturer leaderboard (sales and rating)	High	Medium	4	Yes
N/A	5-chapter Tableau Story	High	Medium	5	Yes
N/A	Country and region demand map	Medium	Medium	6	Yes
N/A	Sales forecasting model (train/test)	Low	High	7	Future scope

Note: the forecasting idea is kept for the Scalability and Future Plan because it needs a separate modelling workflow outside Tableau.
