Customer Journey Map

Field	Details
Date	02 November 2026
Team ID	N/A (Individual Project)
Project Name	EV Value & Longevity Analytics Dashboard
Prepared by	Piyush Malviya
Maximum Marks	2 Marks

The journey map follows a Fleet Procurement Manager who has to recommend which EVs a company should buy, from first opening the dashboard to presenting a decision.

Phase of Journey	Stage 1: Land and Orient	Stage 2: Compare Segments	Stage 3: Check Battery and Value	Stage 4: Decide and Share
Actions	Opens the Tableau Public link and reads the dashboard title and KPI values.	Scans Average Price by Category and Range vs Price to shortlist segments.	Looks at Battery Cycle Life and safety share to judge long-term risk.	Exports the view and presents a shortlist to the purchasing committee.
Touchpoint	Browser, Tableau Public URL.	Bar chart, scatter plot, filters.	Histogram, pie chart, tooltips.	Story chapters, Download PDF or image.
Customer Thought	"Will this tell me quickly which segment gives me the most range for my budget?"	"Hatchbacks and compact SUVs look cheap. Do they give enough range?"	"A longer cycle life means fewer battery replacements."	"I can show the committee the evidence behind this choice."
Customer Feeling	Curious but cautious	Interested, a little overloaded	Reassured	Confident
Process Ownership	Piyush Malviya (BI developer)	Piyush Malviya (BI developer)	Piyush Malviya (BI developer)	Piyush Malviya (BI developer)
Opportunities	Keep the first screen clean with KPI tiles and a one-line guide.	Order bars by value and limit labels to the key ones.	Add tooltips that explain cycle life in plain words.	Add a short instruction on how to export, and a printable summary.

Pain Points Observed Across the Journey

- Too many categories (15) and manufacturers (200) can overwhelm the first-time viewer, so defaults and filters matter.
- Several measures need a plain-language label, for example "cycle life" and "Value Index".
- The viewer needs a clear way to go from the overview to one chosen segment.
