Project Design Phase-II: Solution Requirements

Field	Details
Date	02 November 2026
Team ID	N/A (Individual Project)
Project Name	EV Value & Longevity Analytics Dashboard
Prepared by	Piyush Malviya
Maximum Marks	4 Marks

Functional Requirements

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)	Priority
FR-1	Data Access	Load the training CSV (.gz) and the test CSV into Tableau with all 37 columns.	High
FR-2	Data Validation	Report missing values, duplicate vehicle IDs and total sales; fix data types.	High
FR-3	Calculations	Compute Value Index (price per km of range), average price, range, rating, cycle life and percent by safety stars.	High
FR-4	Visualization	Provide nine worksheets covering sales, battery life, region, price, safety, price vs range, rating, country and trend.	High
FR-5	Interaction	Filters for category, battery type, manufacturer, region and model year that update all charts.	High
FR-6	Storytelling	Five-chapter story that leads from market size to a buying decision.	Medium
FR-7	Publishing	Publish the dashboard and story to Tableau Public and record the links.	High

Non-Functional Requirements

NFR No.	Requirement	Description
NFR-1	Usability	Readable at laptop width, consistent colours, short titles, tooltips on every chart.
NFR-2	Accuracy	Dashboard totals match totals independently calculated from the CSV files.
NFR-3	Performance	Filters and views respond in a few seconds from the extract.
NFR-4	Security	Only public, non-personal data (no names, addresses or customer IDs) is published.
NFR-5	Availability	Hosted on Tableau Public for access at any time through a web link.
NFR-6	Maintainability	Calculated fields are named clearly so a new data file with the same columns can be swapped in.
