Dashboard Design

Field	Details
Date	02 November 2026
Team ID	N/A (Individual Project)
Project Name	EV Value & Longevity Analytics Dashboard
Prepared by	Piyush Malviya
Maximum Marks	5 Marks

The dashboard brings nine worksheets into one screen so a decision-maker can read sales, price, range, battery life, safety and satisfaction without switching views. Design choices follow the principles below.

Design Principles Applied

- Clear layout: two rows of four tiles, with the story reading from market (top) to vehicle value (bottom).
- Right chart for the question: bars for comparison, histogram for distribution, scatter for relationship, line for trend, treemap for share, map for geography.
- Consistent colour: one colour per category and per manufacturer, shared across worksheets.
- Interactivity: clicking a bar, category or country filters the other tiles.
- Tooltips: hover text shows the exact value (for example AmpereWorks, 9,453,209 units).
- Restraint: labels only where they add information.

Dashboard 2 (Tableau Public edition), nine worksheets in a four-column layout

Dashboard Layout

Position	Worksheet	Purpose
Top row	Manufacturing Country Sales; Average Price by Category; Customer Rating by Manufacturer with Safety Rating Distribution; Sales by Market Region	Where vehicles come from, what they cost, how people rate them and where they sell.

Position	Worksheet	Purpose
Bottom row	Range vs Price Analysis; Battery Cycle Life; Sales by Manufacturer; Annual Sale Trends	Value for money, battery durability, who sells most and how volume moves over time.

Major Outcomes

- Market size: 1,550.7M annual units across 17,980 model names, with an average price of $64.9K and an average range of 324.5 km.
- Volume leaders: Two-Wheeler Scooters (174.6M), Hatchbacks (154.9M), Compact SUVs (153.4M) and Sedans (153.4M).
- Battery durability: Solid-State averages 2,997 cycles and LFP 2,502, against about 1,800 for NMC and Sodium-Ion and 1,603 for NCA.
- Value for money: Median price per km of range is lowest for Two-Wheelers ($24), Three-Wheelers ($42) and Hatchbacks ($82), and highest for Luxury SUVs ($222) and Sports Cars ($435).
- Balanced market: regions and manufacturing countries sit within about 3% to 7% of each other, and customer ratings between 4.02 and 4.14.

Planned Refinements

The first draft uses SUM on a few measures where AVG is more meaningful (customer rating, price and range in the scatter). These are listed in document 04 and scheduled for Sprint-2.

Activity: Publish Dashboard on Tableau Public

Dashboard link: to be added after publishing (Sprint-3).
