Story Design: Tableau Story

Field	Details
Date	02 November 2026
Team ID	N/A (Individual Project)
Project Name	EV Value & Longevity Analytics Dashboard
Prepared by	Piyush Malviya
Maximum Marks	5 Marks

A Tableau Story arranges visuals in sequence so the viewer is guided from the overall market to a decision. This story has five chapters.

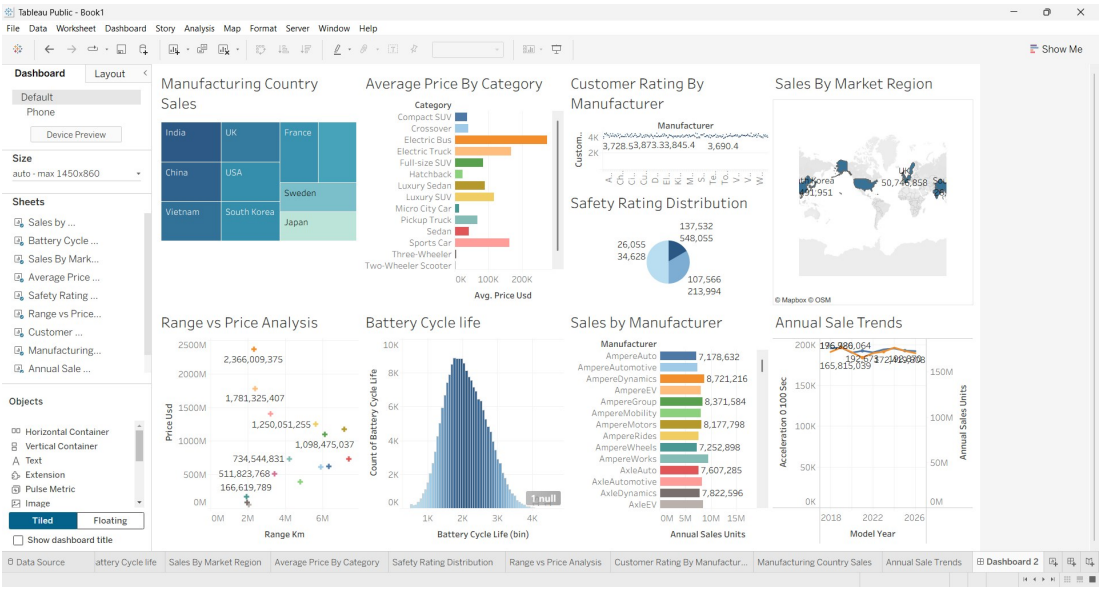

Story Structure

Chapter	Title	Worksheet(s)	Message
1	How big is the market?	Sales by Manufacturer, Annual Sale Trends, Manufacturing Country Sales	1,550.7M annual units; sales dipped to 165.8M in 2021 and recovered to 171M to 177M a year; no single OEM or country dominates.
2	What does it cost?	Average Price by Category	Prices run from $2.6K (scooter) to $274.5K (electric bus).
3	What do I get for the price?	Range vs Price Analysis	Higher price buys more range, with diminishing returns.
4	How long will it last?	Battery Cycle Life, Safety Rating Distribution	Solid-State and LFP lead on cycle life; 76% of vehicles have 4 or 5 safety stars.
5	What should I choose?	Dashboard 2	For lowest cost per km, choose hatchbacks or compact vehicles with LFP batteries; for longevity, Solid-State.

Observations

- Volume leaders: Two-Wheeler Scooters (174.6M), Hatchbacks (154.9M), Compact SUVs (153.4M) and Sedans (153.4M).
- Battery life: Solid-State 2,997 cycles, LFP 2,502, NMC 1,801, Sodium-Ion 1,799, NCA 1,603.
- Five-year degradation: Solid-State 7.4%, LFP 10.1%, other chemistries about 14%.
- Value: median cost per km of range is $82 for hatchbacks and $222 for luxury SUVs.
- Satisfaction is nearly uniform: manufacturer averages differ by only 0.11 stars (4.02 to 4.14).
