Project Demo Planning

Field	Details
Date	02 November 2026
Team ID	N/A (Individual Project)
Project Name	EV Value & Longevity Analytics Dashboard
Prepared by	Piyush Malviya
Maximum Marks	1 Mark

Demo Objective

To show how the EV Value and Longevity dashboard turns a large raw dataset into clear answers about price, range, battery life and safety, and how a fleet buyer can use it.

Demonstration Tools and Setup

- Screen recording: OBS Studio or the built-in Windows recorder at 1080p.
- BI tool display: Tableau Public in a web browser (full-screen).
- Device: Windows 11 laptop (add your own specification if required).
- Backup: dashboard screenshots and the final report open in a second tab.

Demo Agenda and Script Flow

Time	Section	Talking Points
0:00 - 0:45	Introduction	Introduce Piyush Malviya, the project title and the problem: no single view of EV value and battery life.
0:45 - 1:45	Data and Flow	200,000 training rows and 100,000 test rows, 37 columns, validation of nulls and totals, flow into Tableau.
1:45 - 3:45	Dashboard Walkthrough	Show the nine charts. Click a category and a battery type and show other tiles update. Point out Value Index and Range vs Price.
3:45 - 5:15	Story	Five chapters: market size, price, range, battery life, decision.
5:15 - 6:00	Conclusion	Summarise the findings and mention future scope: forecasting model and live data.

Preparation Checklist

- Confirm the Tableau Public link opens in a private browser window.
- Reset all filters before recording.
- Test microphone level and screen resolution.
- Rehearse once with a timer to stay near six minutes.
- Prepare answers to likely questions (why average not sum, why a Value Index, what the test file is used for).
