Team Involvement in Demonstration

Field	Details
Date	02 November 2026
Team ID	N/A (Individual Project)
Project Name	EV Value & Longevity Analytics Dashboard
Prepared by	Piyush Malviya
Maximum Marks	N/A

This project is completed by one person, so no team roles need to be divided. This document records who presents each part of the demonstration and how questions will be handled.

Presentation Roles

Demo Section	Presenter	Duration
Introduction and problem	Piyush Malviya	0:45
Data and architecture	Piyush Malviya	1:00
Dashboard walkthrough	Piyush Malviya	2:00
Story and findings	Piyush Malviya	1:30
Conclusion and future scope	Piyush Malviya	0:45

Question and Answer Preparation

Likely Question	Short Answer
Why is the Value Index price divided by range?	It gives dollars per km of range, a measure that can be compared across very different vehicle types.
Why average instead of sum for rating and price?	A sum grows with the number of vehicles; an average describes a typical vehicle.
What is the test file used for?	To confirm the dashboard measures hold on unseen data and, in future, to evaluate a forecasting model.
Why are region and rating differences small?	The data is evenly spread: regions are within 3% and manufacturer ratings within 0.11 stars, so the dashboard does not over-claim.
What are the limits?	Static files, public hosting and some missing values (1% to 3% in five columns).
